The company is a professional manufacturer of household and commercial mosquito killers, interesting design, development and production. The company has advanced production equipment, professional technology and excellent management talent, and has established the corporate spirit of "human-oriented, professional technology and excellent management talent", the business philosophy of "first-class service, first-class quality, first-class technology, first-class technology, first-class technology", providing first-class service to serve customers. It follows the principle of "first-class service, first-class quality, first-class technology, first-class technology, first-class technology", so that our products can achieve a more perfect combination of high quality, beautiful, healthy and safe, and realize a production system with excellent quality, low cost, small batch and short delivery time.

We have rich OEM production experience and will provide you with reliable quality assurance and professional, thoughtful service. Our products are exported to Europe, America, South America and other countries with good market response and high survival rate.

We always serve mankind with science and technology innovation and science-oriented, in the process of knowledge economy and market globalization, we sincerely hope customers at home and abroad will work together to create brilliant.

我们的品质和服务值得您选择！
Our quality and service are worth your choice!

行业15+年
专业灭蚊器制造商

以质量求生存，以信誉促发展！
Survive by quality, promote development by reputation!

为了您健康睡眠，为了每个家庭，为了您享受一顿丰盛的晚餐，我们应快速而彻底地消灭蚊子，UV灯可以发出蚊子喜欢的波长吸引蚊子飞入灭蚊网内，被通高压电击的蚊子瞬间产生3000伏特3000伏特高压电击灭蚊灯。为了保证人们有一个安全的使用环境，我们所有的产品都符合国际CE、CB、ULC、PSE、EPA、CA65、UKCA、ROHS等权威认证标准。拥有多项中国专利、美国专利、欧洲专利。

In order to stay away from infectious diseases, get a good night's sleep and enjoy a rich dinner, we should stay away from the nuisance of mosquitoes. UV lamps can emit 365 nm wavelength to attract mosquitoes to fly into the mosquito killer, installed in the mosquito killer high voltage network to generate 3000 volts to 3000 volts of high voltage instantly kill mosquitoes. In order to ensure that people have a safe use of the environment, all our products are in line with the mosquito killer CE, CB, FCC, PSE, EPA, CA65, UKCA, ROHS and other quality/safety certification standards. It has a number of Chinese patents, American patents and European patents.

Household mosquito killer Indoor use

家用灭蚊器-室内使用

Plastic Pest Zapper Introduction

- An effective ultraviolet lamp is easier to attract mosquitoes.
- The working life is about 8000 hours.
- The shell is made of ABS, which is strong and durable.
- The detachable mosquito box is easy to clean.

塑料灭蚊器

- 有效的紫外灯更容易吸引蚊子。
- 工作寿命约8000小时。
- 外壳由ABS制成，坚固耐用。
- 可拆卸的诱蚊盒易于清洁。

QH90A

功能特点:

- LED光源 3xLED
- 低功耗节能
- 输出高压约800V-1000V
- 底部配置接收装置
- 工作电压100-240V~

Features:

- LED light source, 3xLED
- Low power consumption
- The output high voltage is about 800V
- Mosquito receiving box is arranged at the bottom
- Working voltage 100-240V~

- 紫外光管寿命可达5000小时;
- 内置1000V高压电网, 通电即可灭蚊;
- 产品底部设有360°旋转底座, 便于清理死蚊;
- ABS材质坚固耐用;
- 顶部配有金属环, 可悬挂。

Features:

- 360°full range can be issued 365NM ultraviolet light wave to attract mosquitoes;
- UV mosquito tube can be used to achieve 5000 hours;
- Built in high voltage board 1000V high voltage current, can effectively kill;
- At the bottom of the product placement easy to remove mosquito contact box, which is convenient to clean the dead bodies of mosquitoes and flies;
- The plastic part of the new ABS material is solid and durable;
- The top is equipped with metal rings, can be suspended.

Features:

1. 20W produces 9000lm ultra bright light to attract mosquitoes.
The service life of UV mosquito trap tube can reach 1000-2000 hours.
2. Equipped with protective netting, it can effectively prevent mosquitoes from being attracted to the light, and has a safety protection to prevent electric shock.
3. Built-in high temperature protection device, 100-120W high temperature, which will automatically stop the light when it is too hot to prevent the light from being damaged.
4. The light tube is made of high quality glass, which is safe and reliable, and has a long service life.
5. The light tube is made of high quality glass, which is safe and reliable, and has a long service life.

How it's a photocatalyst mosquito killing lamp

Photocatalyst mosquito killing lamp is a device that uses photocatalyst technology to attract and kill mosquitoes by releasing a certain amount of ultraviolet light and using photocatalyst technology to kill them.

Working principle

Photocatalyst technology is designed to produce a strong light that attracts mosquitoes, which are then attracted to the light. In this process, an appropriate amount of ultraviolet light and water are released to decompose harmful substances in the air, and the final product is a safe and healthy environment. In the process of attracting and decomposing, mosquitoes will be attracted by the ultraviolet light, and will also be attracted by the light. In addition, mosquitoes will also be attracted by the ultraviolet light and the light. In addition, mosquitoes will also be attracted by the ultraviolet light and the light.
